Professional Summary

Passionate Software Developer pursuing **B.Tech IT** at Nandha Engineering College with a CGPA of **7.675**. Strong foundation in Java, Python, MongoDB, SQL, and REST API development. Experienced in building full-stack applications with secure authentication and scalable backend architecture. Seeking entry-level roles in Backend or Full Stack Development to contribute clean, efficient, and production-ready code.

Education

B.Tech Information Technology

2024 - 2028

Nandha Engineering College, Erode

CGPA: **7.675 / 10.00**

HSC

Rajendra Matriculation Higher Secondary School

SSLC

Rajendra Matriculation Higher Secondary School

Technical Skills

Programming: Java, Python

Databases: MongoDB, SQL

Backend: REST API Development, CRUD Operations

Tools: Git, GitHub, Visual Studio, Postman

Concepts: Full Stack Fundamentals, Authentication Systems, API Integration

Experience

Software Developer Intern

Jan 2026

Skillcraft Technology

- Completed a 1-month internship focused on web development and backend fundamentals.
- Assisted in developing and testing web modules and API integrations.
- Worked with version control (Git) and collaborated in structured development workflows.
- Strengthened understanding of real-world project structuring and deployment basics.

Academic Projects

Smart Rainfall & Reservoir Forecast Application

React Native, Node.js, Express, MongoDB

- Developed a full-stack mobile application with city-based and GPS rainfall predictions.
- Integrated OpenWeatherMap API and custom reservoir data for 5-day weather forecasting.
- Implemented secure authentication and session handling using Node.js and MongoDB.
- Added bilingual support (English/Tamil) and local data persistence using AsyncStorage.
- Designed alert modules for flood and drought notifications.

Personal Projects

Weather & Water Resource Monitoring System

React Native, MongoDB, REST APIs

- Built a real-time monitoring system supporting irrigation and water resource planning.
- Implemented multilingual UI switching across the application.
- Designed backend APIs for authentication and structured data management.
- Focused on scalable API architecture and clean interface design.

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional (Validity upto 2028)
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate (Validity upto 2028)
- Oracle Cloud Infrastructure 2025 Certified Architect Associate (Validity upto 2028)
- Web Development Internship Certificate – SkillCraft Technology (Jan 2026)
- Logic Building and Programming Etiquettes – Coderead Software Training (Jan 2026)
